

## 20 SERIES BY ANY STRETCH OF THE IMAGINATION

Give your promotions real stopping power with the stretched displays from iiyama.

With a continuous 24/7 operating time, landscape and portrait orientation, 1000cd/m<sup>2</sup> brightness and 1/3<sup>rd</sup> height compared to a standard display, the 28" S2820HSB-B1 and 38" S3820HSB-B1, can be used in situations where regular 16:9 ratio signage display just won't fit.

Ideally suited for retail, transportation, business and health care environments where visibility is key.

### SUNLIGHT READABLE

The higher brightness of 1000cd/m<sup>2</sup> makes the 20-series ideal for brightly lit environments. Even with direct sunlight shining on the display, your content stays clear and sharp.

### AUTOMATIC BRIGHTNESS ADJUSTMENT

When using a digital signage display for your in-store advertising, you want your message to be clearly visible at any time of the day.

The 20-series displays are equipped with brightness sensors that can automatically adjust the brightness of the display to match the brightness level of the environment.

### ENDLESS POSSIBILITIES

Because of the 1/3<sup>rd</sup> height compared to a regular signage display, the 20-series displays can be installed virtually anywhere. On top of a shop display, in between two elevators, above your reception or on a pillar in your hallway, it's up to you!

### EASY TO USE

The 20-series feature carrying handles on the back, VESA mounting patterns and they offer portrait orientation left and right, simplifying handling and installation.

20 SERIES	28" iiyama	38" iiyama
	S2820HSB-B1	S3820HSB-B1
