

CONFLICT MINERALS REPORT OF IYAMA CORPORATION

Concerns are rising regarding mineral resources, which are significant as raw materials used in IT and electronic components. In conflict-affected and high-risk areas including the Democratic Republic of Congo (DRC) and adjoining countries, the mining of such minerals may result in funds for groups that engage in conflicts and illegal acts such as the violation of human rights including forced labor and child labor, environmental destruction, and money laundering. Accordingly, the use of these minerals could promote the activities of such groups.

Based on our view that it is our social responsibility to take this issue into consideration, the IYAMA CORPORATION aims at procuring minerals from sources with no involvement in conflicts or illegal acts (i.e., to procure conflict-free minerals) for use in our products.

To realize this goal, we conduct surveys on our entire supply chain and check the survey results to ensure that specific minerals (the four mineral resources (tantalum, tin, tungsten, and gold) defined as conflict minerals by the U.S. Dodd-Frank Act, and cobalt) are procured from sources that have no relation with illegal activities. If we discover that a source may have a relation with conflict material, we will request supplier stop using it and find alternative material from conflict-free source. Furthermore, we participate in the Responsible Minerals Initiative (RMI) and continuously support responsible minerals procurement from conflict-affected and high-risk areas.

Reasonable Country of Origin Inquiry (RCOI)

It is a common Industry practice for most companies with electronic products to utilize conflict materials for the necessary functionality or production of the products. Iiyama conducted a reasonable Country of Origin inquiry (RCOI) to determinate if conflict minerals did originate in the Democratic Republic of Congo, or the covered Countries (CC). We used the Responsible Minerals Initiative (RMI) program for RCOI by using the CMRT Template which is used by Industry. We also required to our supplier to use the CMRT's with their supplier bases.
