

21.5" high-brightness touchscreen with 10 touch points PCAP touch technology for semi-outdoor applications

Built into a rugged, edge-to-edge glass bezel the ProLite OTF2216MC-B1 guarantees high durability and scratch-resistance, making it perfect for high use public facing applications. Landscape, portrait and face-up orientation ensure flexibility in any type of installation. It offers a brightness of up to 935 cd/m², the content displayed will be visible even in very bright environments. The anti-glare display is UV resistant and IP65 protected, ensuring durability against sunlight, dust and water resistance from the front, additionally it can operate in temperatures ranging from -20°C up to +60°C. The anti-fingerprint coating ensures a smoother touch. A reliable solution for pick-up points and kiosks. A proximity sensor turns off the screen when no one is present, an ambient light sensor adjusts screen brightness, and a temperature sensor controls fan speed for cooling, resulting in energy savings and extended product durability. For ease of integration, the ProLite OTF2216MC-B1 can be equipped with optional external mounting brackets (OMK3-1) making it an ideal solution for kiosk integrators, industrial environments, control rooms and interactive multimedia.

High-brightness

The display offers a brightness of up to 935 cd/m², so that the content displayed on the screen is clearly visible even in very bright environments.

Smart sensors

A proximity sensor turns the screen off after a while when it detects no one in the environment, an ambient light sensor adjusts the screen brightness when ambient light changes, and a temperature sensor linearly controls the fan speed, cooling the monitor when the temperature rises, resulting in energy savings and extends the durability of the product.
